-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3-11, and 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1 382 254 A1. The EP 1 382 254 A1 reference discloses the claimed invention except for a bottom of each stopping pin guide groove being higher than a bottom of each pivot pin guide groove. It would have been an obvious matter of design choice to have a bottom of each stopping pin guide groove being higher than a bottom of each pivot pin guide groove, since applicant has not disclosed that having a bottom of each stopping pin guide groove being higher than a bottom of each pivot pin guide groove solves any stated problem or is for any particular purpose and it appears that the invention would perform equally well.

Claims 2, 12 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 1 382 254 A1. The reference EP 1 382 254 A1 discloses the claimed invention except for the pins being made of heat-resistant rubber or elastic material. It would

have been obvious to one having ordinary skill in the art at the time the invention was made to have made the pins of heat-resistant rubber or elastic material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice.

*In re Leshin*, 125 USPQ 416.

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
